Article ID:	3440219-5322
Weight:	1030 g
Volume:	24 litre
Size:	53 / 30 / 19 (H x W x D) cm
MSRP:	219.99 A\$

The clean-cut, light backpack is very versatile. It proves to be the perfect companion on via ferratas or during challenging hikes. The functional backpack sits close to the back even during extensive moves thanks to the innovative carrying system with the Aircontact Trail contact back - and it provides pleasant ventilation. It's an excellent via ferrata backpack through innovative details like the carabiner loop on the shoulder strap.

HIGHLIGHTS OF TRAIL 24 SL

SL Women's Fit On average, women's backs are not quite as long as men's. The SL carry system is thus slightly shorter than that of Deuter's standard rucksacks. Consequently, the models in the SL series are the ideal choice, too, for male users with shorter backs.	Aircontact System Aircontact Back System	Active Comfort Fit
Derlin Frame Tensioned Delrin® U Frame provides stability with little extra weight.	Side Pockets	missing translation missing translation
Sternum Strap	Raincover	Valuables Pocket
Wet Pocket	SOS-Label	Hydration System 3.0 L Compatible Hydration System Compatible
Hiking Pole Attachment Attachment loops for hiking poles	Attachment for ice axe or hiking poles Attachment loops for ice axe or poles	PFC Free High-performance materials with a PFC-free coating to resist water and dirt
Breathable Hip Fins Lightweight mesh hip fins provide carrying comfort, distribute the weight and create breathability around your hips.	Load Adjustment Straps to individually adapt the pack's centre of gravity	Pull-Forward Hip Fin allows an easy and precise adjustment

SUITABLE FOR

 Hiking

 Climbing

 Mountain Climbing

BACK SYSTEM: AIRCONTACT TRAIL SYSTEM

- 1 Load adjustment straps allow precise positioning of the backpack.
- 2 Anatomically shaped shoulder straps with 3D AirMesh lining.
- 3 Flexible, tensioned Delrin® U-shaped frame provides stability at minimum weight. It follows the most varied movements with absolute ease. The frame combines with the body-hugging fit to create a compact carry system with even load distribution and effective load transfer.

MATERIAL

600D PES

Made from 600 den Polyester thread and with a thick PU coating, this multi-purpose fabric is robust and lightweight. It is most suitable for backpacks, used in average conditions to keep the weight to a minimum.
