

KID COMFORT PRO

Colour:	midnight
Article ID:	3620319-3003
Weight:	3550 g
Volume:	12 litres
Size:	80 / 43 / 34 (H x W x D) cm
MSRP:	359,95 €

Mountain adventures become much more pleasant with the ingenious, new Aircomfort Sensic Vario mesh back system. The weight of the load is transferred perfectly, the child carrier fits securely while the back is fully ventilated. The children are comfortable too: the large, soft pillow gently braces the tired child's head even in the corners and supports a relaxing nap. The side entry and the easy to access harness system ensure safety which the TÜV GS safety seal of approval guarantees. Additionally the pro child carrier comes with an integrated, separately useable daypack for quick missions to the changing room or on the way to the buggy. There is also a sun roof and a mirror for a quick rear-view of the child on the back.

HIGHLIGHTS OF KID COMFORT PRO

Aircomfort System

On small to medium backpacks that are at home in easier terrain we go for maximum ventilation. The heart of the Aircomfort systems – tested and proven for decades – is its flexible spring steel frame. It is extremely durable, provides stable tension for the airy back mesh and creates the ventilation space between pack and wearer's back for the moist, warm air to dissipate. 1984 Deuter invented & patented the first mesh back system worldwide.

Bottom Compartment

With removable separator for ideal gear access and load placement.

Pockets on the outside

stretch pockets on the side and in the front provide additional storage space

Padded Hip Belt

An additional padding on the hip belt provides more carrying comfort.

Sternum Strap

The sternum strap stabilizes the pack on the shoulders.

Hydration System 3.0 L

Compatible compatible with Streamer 2.0 I & Streamer 3.0 I

PFC Free

High-performance materials with a PFC-free coating to resist water and dirt

Daypack included

This pack comes with a small daypack for side tours.

Load Adjustment Straps

to individually adapt the pack's centre of gravity

Pull-Forward Hip Fin

allows an easy and precise adjustment

Vari Slide System

Deuter's new Vari Slide system provides even easier back length adjustment options than before!

SUITABLE FOR

Hiking

City

Family

BACK SYSTEM: AIRCOMFORT SENSIC VARIO

1 ACTIVE-FIT SHOULDER STRAPS

Agile ActiveFit shoulder straps fit comfortably through their self-acting adjustment to width and angle of the shoulder area.

2 ARCHED PROFILE FRAME

Up to 70% of the load is transferred from the back to the hips via an arched profile frame made of permanently elastic, break-proof spring steel. Lightweight and flexible, its ergonomic shape ensures a perfect fit combined with freedom of movement.

3 VARIFLEX ECL HIP FINES

Save energy while carrying through auto-adjust Variflex ECL (Ergonomic Comfort Lock) hip fins. They custom fit to the hips and distribute weight comfortably thanks to ergonomic pads and a gap-free transition from the back system.

4 AIRCOMFORT MESH NET

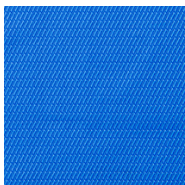

Trekking backpack with maximum ventilation thanks to the Aircomfort mesh back system. A durable frame construction designed from flexible and break-proof spring steel provides stable tension for the Aircomfort mesh net creating a ventilation space between wearer and pack. Medium loads can be carried perfectly ventilated and comfortable with this combination of effective load distribution and back-length adjustment.

5 VARISLIDE ADJUSTMENT

The VariSlide System guarantees a perfect fit for every back lengths. A central, easy to access buckle allows fast and incredibly easy adjustment of the system.
