SUITABLE FOR

 Climbing

MATERIAL

210D PA

We use the Nylon material in hard wearing 420 denier and 210 denier density. Special high density denier polyamide offers high abrasion resistance with it's very tight weave. This top quality fabric is used for Guide backpacks and Travel range models. PU coating.

420D PA

This slightly lighter material is characterized by a very tight and smooth weave. This increases the abrasion value and its repellent attributes against snow and dirt. Due to the smooth polyamide filaments, the material reaches a higher gloss level. Used with a PU coating.
