till Bodysize:	165 cm
Shoulder Width:	84 cm
Bottom Width:	0 cm
Pack-Size:	ø 15 cm x 36 cm
Outer lining:	30D PA Ripstop
Inner lining:	30D PA
Fill:	Down
Fillweight:	400 g
MSRP:	299,95 €

Our sleeping bags for professionals are also bluesign® products with RDS-certified down! They are guarantors of regenerative sleep on demanding trekking or mountain tours. The inner sleeve wraps gently around the sleeper thanks to elasticated chamber stitching to effectively prevent the formation of cold spots. Inside the outer sleeve the inner sleeve can expand by up to 25% in width to create more space inside the ASTRO PRO models. The pronounced differential cross-section allows the down to achieve its full loft potential. Longitudinal chambers situated below the knees prevent the down from sliding to the side to guarantee outstanding heat insulation. In addition, the sensitive area around the feet is kept warm by a three-dimensional foot box with an especially comfortable filling.

HIGHLIGHTS OF ASTRO PRO 400

Warmth Collar

THERMAL COLLAR with Velcro closure avoids cold spots. Three dimensional construction for a comfortable, snug fit around shoulders and neck.

Inside Pocket

internal zip pocket for valuables

Stretch Comfort System

MUMMY SHAPE WITH STRETCH utilises highly elastic baffle stitching. The Ther-mo Stretch Comfort technology creates a snug fit which warms the body up quickly and simultaneously allows the bag to expand up to ¼ in width offering fantastic freedom of movement.

Ergofoot

RAISED FOOT BOX designed with the natural feet position in mind, it provides additional comfort and freedom of movement.

Trapezoid-Chamber

Construction

Opposing diagonal trapezoid pockets and additional full-length chambers on the side ensure the down is stabilised. Cold spots are thus avoided guaranteeing maximum warmth insulation.

Dryzone

keeps moisture outside with a water repellent shell material in the head and foot section .

Extra Long (EL)

Tall people can enjoy a perfect fit with our Extra Long EL-models!

Ergo Hood

Easy to use contour hood even in the dark thanks to one round and one flat drawcord

PowerBox

Down does not slip when the legs are moved thanks to the innovative PowerBox design with a waffle structure formed by combining longitudinal chambers and traverse stretch seams on to the top of the sleeping bag from the knees downwards.

bluesign® Product

SUITABLE FOR

 Mountain Climbing

 Trekking

 Camping

CONSTRUCT: TRAPEZOID-CHAMBER

MATERIAL

30D PA

This top quality 30 denier inner lining material achieves its silky soft texture through ultra-fine weave. The feather light, durable and easy-care micro-fibre material is extremely soft on the skin and is excellent at wicking moisture away. Used in our down sleeping bags.

Down

30D PA Ripstop

This ultra-fine Nylon ripstop material is extremely soft to the touch and lightweight. It is very thin, yet offers great stability and abrasion resistance thanks to its rip stop structure. Like the "PRO Lite RS" it is durable and quick drying.
