HIGHLIGHTS OF GIGA FLAT

Airstripes System

A bike pack always has to sit secure and snug on your back – even on the roughest rides. Our unique Airstripes System takes care of that and offers effective ventilation. It consists of two contoured, air-channeled foam profiles that are covered with a highly breathable Wide AirMesh lining. The reduced contact surface results in an optimized fresh air circulation. Also, the pack's load is kept close to the body and thus won't throw the rider off balance.

Sternum Strap

The sternum strap stabilizes the pack on the shoulders.

Valuables Pocket

special pocket on the inside of the pack to keep valuable items safe
